

Assignment

Write script in unittest framework first and then try with robot framework

1. Navigate to <https://househunt.london.ac.uk/>
2. Click on Find Your Property
3. Switch to new window
4. Click on Search
5. Fill dropdown as below screenshot

The screenshot shows a web browser window for the University of London Housing Services website. The URL in the address bar is househunt.london.ac.uk/search?university=Royal%20Academy%20of%20Music%20(RAM)&campus=Main%20Campus&university_id=10&campus_i... . The page title is "Search A Property". At the top, there are dropdown menus for "Royal Academy of Music" (selected), "Main Campus" (selected), "Move in date" (dropdown open), "Move out date" (dropdown open), and "More Filters" (button). To the right of these are "See Results" and "Price: High To Low" buttons. Below this, there is a "List" button and a "Map" button. The main content area displays "1694 results" and a grid of property cards. One card is visible, showing a thumbnail image of a building, the text "2 Bed Flat", "1.54 Miles From Campus", "Flat / Royal College Street", "NW1, London", and a small lock icon.

6. Click on See Results and apply explicit wait until you get list of properties
7. Sort the properties as Low to High and print the names of first 5 properties
